

To our Valued Customers,

In the past number of days Quebec and Ontario have have imposed a complete shut down of all “Non Essential” businesses as part of their efforts to contain the spread of COVID-19.

As other Provinces and municipalities follow suit, we understand how this may leave you concerned about your print supply chain and whether or not you will have access to much needed products.

By current definitions, Westkey has been deemed an Essential Service. To accommodate our customers in light of this status, we have made many adjustments throughout our facilities across Canada. These changes are in place to enable us to provide continuity of service and supply to our National client base as well, to protect the safety and health of our staff, vendors and clients alike.

Through this time, Westkey | Xibita have received requests from our customers for unusual products to help them conduct their business in a responsible and safe manner; items such as public notices boards and sneeze guards. We will continue to share these stories over the coming days, and are happy to help our customers in any innovative way that we can.

Wishing you health, safety and confidence in these challenging times.

Alfie Karmal, President and CEO.
